*CONVERSION OF UNITS OF CREDIT FOR  
HISTORICAL STUDENT RECORDS*

*RESOLVED AB99/118*

That the Academic Board approves that the units of credit associated with historical course enrolments be calculated from the *study load* generated by a student's enrolment in the course, converted into 48 units of credit, rather than the historical credit points held on the SIS course file, with the exception of General Education courses where the historical credit point value be used.
